Washington, D.C.

OFFICE OF THE DIRECTOR

15 May, 2012

MEMORANDUM FOR: Dr. WARREN

DR. KURI-KYOTOMOTO-SMITH
COL. BEHR, USAF
MAJ. RUSTON
AGNT. STROTHBERGENHEIMER-
KLAUSTERSCHMIDT

SUBJECT: Sonic Capabilities of the new Gatcomb
Majestic 6

The new Gatcomb Majestic 6, an electric guitar powered by physics, has the potential to become a powerful force in the rock 'n' roll battleground, as well as [REDACTED]. Equipped with a duo of hot handwound single-coil pickups and a modest phase switch (and, it is suspected, a [REDACTED] control that toggles [REDACTED]) the guitar is capable of everything from thick full-throated growl to thin "wonky" atomic sounds not heard before in the world of fine musical instruments.

It is the opinion of this office that the Majestic 6's sonic potential lies in its many contemporary features, the specs of which are listed as:

- 25.5" scale length
- Hand-shaped custom one-piece maple neck with rosewood fretboard
- 21 custom-shaped low-profile nickel/silver "Ultra Sonic" frets
- Hand-rubbed satin neck finish
- Dense northern ash body with black grain filler and super thin transparent red low gloss polyurethane finish
- Chrome pickup surrounds, one-piece pick guard, and classic "surf" type vibrato
- Now available with PAT. PEND. aluminum string mute
- Proprietary [REDACTED] system alleged to harness atomic energy for use in [REDACTED]

All agents are advised to exercise caution around the Majestic 6 as its sonic capabilities may inadvertently pick up radio communications between ReconIntel and Washington. MSRP is a mere \$899.00 (\$859.00 for hardtail version), a price point making the guitar available to all potential musicians, rogue [REDACTED] or otherwise. Custom options are available, including, but not limited to, maple fretboards, custom colored dot inlays, and various humbucker and single coil configs. Furthermore, it is advisable to [REDACTED] at all cost, particularly in the [REDACTED] region where OPERATION MARS SHIPMENT is [REDACTED]
